

SCUBAPRO

THE ONLY THING YOU'LL FEEL IS INSPIRED.

Exclusive Trufit technology.

A comfortable, well-fitting mask is essential to having an amazing underwater experience. That's why every Synergy mask includes revolutionary Trufit technology in the skirt, ensuring lasting comfort for any face shape.

SCUBAPRO

FEELS LIKE NOTHING. FITS LIKE NOTHING ELSE.

TRUFIT TECHNOLOGY

This revolutionary skirt design forms a watertight seal on virtually any face, allowing divers to have a secure mask without sacrificing comfort. Trufit skirts are designed with the highest quality silicone and are identifiable by their unique ribbing texture.

SYNERGY 2: new generation design features two separate silicone skirts. The main skirt is thin and soft to provide the best possible fit, seal and comfort. The outer skirt is thick to provide support and rigidity near the mask frame.

SYNERGY TWIN: original design features one skirt with two thicknesses of silicone. The skirt is thicker near the frame and thinner near the face for great fit, seal and comfort.

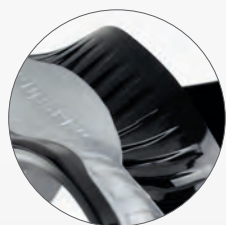

ULTRA CLEAR LENS: Standard glass has a slight green tint, resulting from impurities that do not have a big influence on vision but can distort true colours and reduce light transmission through the glass under low light conditions. SCUBAPRO Ultra Clear lenses offer exceptional clarity together with brighter vision underwater.
