FREEDIVING 80

THE FUTURE OF DIVING STARTS WITH YOU.

HUMAN FACTOR DIVING™

Your gear should adapt to you, allowing you to personalize every aspect of your dive. This is the guiding philosophy of every SCUBAPRO innovation. Human Factor Diving™ keeps you at the center of the experience, before, during, and after your dive—with gear that's intuitive, comfortable, and perfectly suited so all you have to focus on is having an incredible dive experience.

EXPERIENCE
HUMAN FACTOR
DIVING™ EVERYWHERE

SCUBAPRO leads in every category with gear that's intuitive, comfortable, and leaves you free to explore.

REGULATORS

Adapted to your breathing style, and type of diving.

INSIGHT

There's no one-size-fits-all approach to creating gear that works around you. With patented features that no other company offers, SCUBAPRO is always improving our gear, taking diver feedback into the development process and making it better and smarter. It's an ongoing conversation about your needs, and how you're using the products to make your dive unforgettable.

EVALUATION

Designed by divers for divers—each new product is thoroughly studied in real dives to prove its usability, long before it ever hits the shelves. Our equipment is tested with more rigor than any certification agency requires, so once it's finally released to the public, you know it will live up to the SCUBAPRO name. A name that's trusted by militaries, public safety, and specialized diving research organizations around the world.

PERSONALIZATION

Gear developed with the Human Factor Diving™ approach is so smart and intuitive, our divers only need to focus on one thing: exploration. We work proactively to solve common issues most divers face, in order to make diving a better, more enriching experience. That's because, for SCUBAPRO, the effort to continually innovate more adaptive gear is never over.

COMPUTERS

Personalized dive profiles created using your own biometric measurements.

BCs

Unmatched fit and function, allowing you to take control of your buoyancy.

SUITS

Body Mapped to ensure outstanding warmth, comfort, and fit.

TAKE IT ALL IN.

Discover the peace of exploring underwater, hearing only the beat of your heart and the relaxed rhythm of each breath. With SCUBAPRO regulator systems, you can do what comes naturally, and leave the ordinary behind. Trust the most advanced technologies to give you a truly incredible experience.

THE UNDISPUTED LEADER IN REGULATORS.

When it comes to SCUBAPRO regulators, divers have many choices, including piston and diaphragm designs, user adjustments and convenience features available nowhere else. But a regulator must, first and foremost, deliver smooth and effortless airflow, in all dive conditions, at all depths, with unquestioned reliability. And that's where SCUBAPRO truly shines.

Constructed from the best materials available, such as titanium and carbon fiber

ADVANCED FIRST STAGES

A PROVEN LEGACY.

Why do so many militaries and public safety teams buy SCUBAPRO? Because they require equipment that can meet their stringent standards, that can endure rugged use, and that can always be relied upon to work when needed. When you buy SCUBAPRO, you're in good company. These models consistently outshine the competition in independent regulator tests, delivering low-effort airflow regardless of diving depth or breathing rate.

A REGULATOR FOR EVERY DIVE.

SCUBAPRO draws from its great variety of regulators to create ideal systems for any diving: casual recreational, travel, cold-water, deep, or technical.

- Two air-balanced flow-through piston first stages.
- Two air-balanced diaphragm first stages.
- One classic downstream piston first stage.
- Five second stages with air-balanced valve technology.
- One second stage built with Optimal Flow Design.
- One second stage built with classic downstream valve technology.

All that's left is to pick the perfect system for your goals and diving style.

BUILT AND TESTED TO BE THE BEST.

Each SCUBAPRO regulator prototype is designed, engineered, and tested before being put into production. Sophisticated ANSTI breathing machine tests that monitor regulator performance in simulated diving situations are followed by rigorous pool testing and ocean testing in worldwide locations. Only after a prototype successfully completes this rigid testing process is it deemed ready to go into production. To date, more than three million regulators have been produced in SCUBAPRO's factory in Italy.

with unquestioned reliability

A700

The exceptional A700 second stage, teamed with a perfectly matched MK25 EVO or the new MK17 EVO first stage, forms the ultimate high airflow system for all diving needs. SCUBAPRO sets the standard for second stage regulator performance with the A700. Integrating air-balanced valve technology, the A700 brings you extraordinary breathing performance in a striking, precision-handcrafted, full-metal package – or in a lighter carbon fiber cover. Whatever your dive destination, the SCUBAPRO A700 lets you breathe effortlessly and naturally underwater for a lifetime of exceptional dive experiences.

MK25 EVO/A700 CARBON BLACK TECH new

A lightweight yet virtually indestructible carbon fiber front cover plus a durable Black Tech coating deliver excellent protection while offering superb breathing performance for technical diving and more.

MK25 EVO/A700

This always-impressive system can be counted on for steady, effortless airflow and exceptional cold-water protection with its patented Extended Thermal Insulating System [XTIS] technology.

A700 new CARBON BLACK TECH

Up the Intensity
Pair A700 Carbon Black Tech with the new Mantis Black.

SCUBAPRO's A700s are already legend. The latest A700 lives up to its own reputation, and now features a carbon fiber cover that's virtually bulletproof. Upgrade to the world's most incredible second stage that's now even lighter and more compact than ever.

DLC Black Tech Finish

The same coating trusted by the world's premier auto racers. This finish doesn't just look intense; it shields your premium second stage from corrosion and scratches, leaving it shining dive after dive.

MK25 EVO
Carbon BT
First Stage

Superb Breathing Performance

Breathe more easily than ever, thanks to a sectional exhaust tee, large diaphragm, and air balanced valve.

- **Sectional Exhaust Tee**—Operates in tandem with an oversized exhaust valve for easy exhalation.
- **Large Diaphragm**—Increases breathing sensitivity to another level.
- **Air Balanced Valve**—Smooths inhalation effort when diving at varying depths and supply pressures.

new

Carbon Fiber Cover

Hand-assembled with the highest-grade carbon fiber on the market. It makes the new A700 much lighter, increasing comfort and reducing mouth strain.

S600

The MK25 EVO/S600 regulator has become synonymous with SCUBAPRO quality and unbeatable engineering. It combines the best-selling air-balanced second stage with the top-performing air-balanced piston first stage for flawless performance and ease of breathing. SCUBAPRO offers three different models, each with its own specific features and benefits. The Titanium is specially designed for ultra-lightweight portability, and the Deep Blue model delivers scratch- and corrosion-resistant protection. All models offer instant and constant delivery of ultra-high airflow for incomparable performance in all conditions. And new this year, all S600 models are paired with matching MK25 EVO first stages.

MK25 EVO/S600

Flawless performance and ease of breathing are the essence of this system. The preferred combo of professionals or any diver embarking on long, deep dives that require ultra-high performing cold-water protection.

PERSONALIZE YOUR S600

WITH THESE INTERCHANGEABLE PURGE COVERS

*Available as additional accessories - sold separately.

MK25 EVO/S600 TITANIUM

new

Our top technology in an ultra-lightweight, corrosion-resistant package – great for travel. The first stage is machined from a solid block of titanium with Extended Thermal Insulating System [XTIS] cold-water protection; the second stage boasts a titanium interior barrel.

MK25 EVO/S600 DEEP BLUE TITANIUM CORE

new

SCUBAPRO's top regulator technology is paired with a MK25 EVO Deep Blue first stage this year. Our Deep Blue PVD finish ensures high scratch and corrosion resistance. Combined with an interior titanium barrel second stage for lightweight performance.

INTRODUCING THE MK17 EVO

- NEW STREAMLINED DESIGN
- ENVIRONMENTALLY SEALED
- INCREASED AIRFLOW
- REROUTED PORTS

MK17 EVO/S600 new

The ideal system for tech divers and cave explorers. New environmentally sealed first stage is designed for cold waters and less-than-pristine dive conditions.

MK25/S600BT

Our innovative Black Tech finishing process is extremely scratch- and corrosion-resistant. This premium finish gives a real technical plus to a high-performing system.

MK17/S600

A system designed to deliver good performance and ease of breathing in all diving conditions.

G260

The G260 is a balanced, adjustable second stage featuring metal components for excellent cold-water resistance (inlet tube, orifice, inhalation control knob, and hose connector). Its high performance makes it a choice for all demanding divers and it will be the natural choice for G250 fans. The left-right hose attachment option makes it ideally suited for tech diving configurations. Available in a Black Tech version featuring a durable DLC (Diamond-Like Carbon) finish that protects against salt water and corrosion.

MK25 EVO/G260 BLACK TECH

new

Aimed at technical divers, this system offers excellent resistance to freezing and effortless air delivery. A sleek Black Tech scratch-resistant coating protects both first and second stages.

MK25 EVO/G260

The ideal system for tech divers and cave explores, perfect for extreme cold-water conditions and with rock-solid performance.

MK25 EVO/G260 TACTICAL

Aimed at technical divers, this system can face any dive situation—including extreme cold-water conditions—with rock-solid performance and outstanding reliability.

S360

An air-balanced second stage with adjustable VIVA. This system is based on the S560 second stage, but with pre-tuned inhalation for uncomplicated use. It's an ideal choice for avid divers wanting performance yet a simple-to-operate system.

MK17 EVO/S360 new

The new MK17Evo is ideal for Tech and Cave explorers, this new environmentally sealed first stage is designed for cold water and less than pristine diving conditions, matched with the new S360 balanced second stage its perfect for divers wanting a mid-range price point regulator system for technical diving.

MK11/S360

Fully pre-tuned and easy to use; an affordable yet well-breathing system for recreational divers.

S360 OCTO

Air-balanced back-up regulator for easy breathing with an easy-to-reach 39-inch hose and high-visibility yellow cover.

MK21/C350 new

SCUBAPRO's smallest second stage teams with the compact MK21 to create a high performance breather that's just the right size for easy dive traveling.

MK21/S560

More than an excellent mid-range system. This combination offers high performance and value. Optimized thermal exchange thanks to external fins. Optional routing cap available.

MK11/R195

An extremely reliable and durable system with "all rounder" capabilities in temperate and warm waters. Ideal for beginners traveling to various diving locations.

R195 OCTO

Combines the features of the R195 with a high-visibility yellow cover and a 39-inch yellow hose for easy sharing.

Visit your local dealer or SCUBAPRO.com for more information on these systems, as well as additional options for first and second stages. Many first stages are offered as DIN as well. And, other second stages can be purchased as redundant air sources.

MK2 EVO/R095

A totally evolved classic downstream piston first stage, now more of a workhorse than ever. With increased breathing sensitivity and better airflow, cold-water resistance is dramatically increased.

R095 OCTOPUS

Combines the features of the R095 with a high-visibility yellow cover and a long yellow hose [1 m / 39 in] for easy sharing.

AIR2 5TH GENERATION

This fifth-generation octo/inflator is both versatile and easy to use. As a backup regulator in high-stress situations, the AIR2 breathes like a dream, rivaling some second stage models. It is CE-certified for waters 10-degree Celsius or warmer. The large, flexible purge button provides quick clearing when it counts. Divers can also enjoy pinpoint buoyancy control with the AIR2. Its large inflate and deflate buttons are easy to distinguish, and the device fits comfortably in hand. For reliable performance without dangling hoses, the AIR2 is a standout.

COMPARISON CHART

REGULATOR COMBOS

FIRST STAGE

Air-Balanced Piston:

Ultra-fast breathing response regardless of pressure or depth.

Balanced Diaphragm:

Keeps water out while delivering air promptly at all tank pressures.

Classic Downstream Piston:

Reliable performance with minimal maintenance.

XTIS

Full Titanium Body

Dry Chamber

Low Pressure Ports [HFP*]

High Pressure Ports

Swivel Ports

Externally Adjustable Intermediate Pressure

Optional 5 HFP Cap

SECOND STAGE

Air-Balanced Valve:

Ultra-high airflow that remains stable under all conditions.

Optimal Flow Design:

Special barrel and poppet design to optimize airflow.

Classic Downstream:

Simple operation with rugged, reliable performance.

Titanium Valve Housing

Metal Valve Housing

Metal Components

Adjustable Inhalation Effort

Coaxial Adjustable VIVA

Adjustable VIVA

Large Diaphragm

Super Comfort High-Flow Mouthpiece

Reversible Hose Attachment

A full-page background image showing two divers underwater. The diver on the left is in a black wetsuit with purple accents and a SCUBAPRO logo, swimming horizontally. The diver on the right is also in a black wetsuit, wearing a watch, and is positioned near a large, rusted metal structure, possibly part of a shipwreck. The water is clear blue with some bubbles and light filtering from above.

INTELLIGENCE AT HAND.

Every diver feels more confident with the advanced features of SCUBAPRO computers and instruments—combining patented, groundbreaking biometric technology, intuitive operation, and Human Factor Diving™. Whether you're new to the sport, or a long time diver, there's a SCUBAPRO computer to make every adventure better.

INTELLIGENCE THAT SETS THE STANDARD.

SCUBAPRO has been revolutionizing dive computers since day one. Pioneering oil-filled devices, air integration, and heart rate monitoring was just the beginning. Divers turn to SCUBAPRO for exclusive technology, reliable performance, and unmatched selection.

Consistent, adaptive algorithms maximize safety and dive time

DON'T JUST MEASURE YOUR BIOLOGY. USE IT.

ADAPTIVE ALGORITHM

Fine-tunes your decompression plan based on your workload as indicated by biometric feedback.

HEART RATE MONITORING

Provides a more complete picture of your workload so you can respond promptly to heightened stress or over-exertion.*

SKIN TEMPERATURE MONITORING new

Available when using the SCUBAPRO HRM belt, this patent-pending feature incorporates another critical biological factor into your adaptive algorithm.

MICROBUBBLE SETTINGS

Enables the adaptive algorithm to adjust based on your experience level, age, and physical conditioning.

PROFILE DEPENDENT INTERMEDIATE STOPS (PDIS)

Calculates an intermediate stop based on how much nitrogen your body has endured, taking into account your current dive, previous dives, and breathing mixes.

*Available with the Galileo and Mantis series. Diver must be wearing SCUBAPRO Heart Rate Monitoring Belt or Polar belt.

Dive,
Freediving,
Gauge, and
CCR modes

Diving profiles based on your biometrics

Easy to use, intuitive menus designed by dive and usability experts

Configurable displays allow you to see as much information as you want

PATENTED TECHNOLOGY AVAILABLE NOWHERE ELSE.

Only SCUBAPRO offers computers developed with the Human Factor Diving™ approach. Divers have the power to see their own biology analyzed and applied to their dive profile—in real time—for a completely customized dive profile. You can measure your heart rate, breathing workload, and even skin temperature—a patented feature only available from SCUBAPRO*. No other name offers the same level of personalization.

PROVEN COMMITMENT TO QUALITY.

Before ever reaching your local dealer, SCUBAPRO prototypes must pass rigorous tests performed by divers and independent research labs. There, all components are subjected to relentless trials for usability and performance. It's the only environment tougher than the real world.

A COMPUTER FOR EVERY DIVE.

Stay nimble with an easy-to-operate wristwatch-style computer, or go pro with fully loaded models. The advanced SCUBAPRO technology in every computer enhances your experience, wherever the dive may be.

STROKE COUNTER

Record your distance—in the open water or the pool—to track progress of your fitness goals. Available in swim mode.

TRACK YOUR PROGRESS

Data gathered through your self-tracking computers can be downloaded for analysis using LogTRAK and SmartTRAK software, available for PC, Mac, and as an Android app.

CALORIE TRACKER

Another valuable health tracking technology available with LogTRAK software.

HUMAN FACTOR DIVING™

Extensive choices for every diver
Differing modes [CCR, Multi-Gas, and Gauge] allow recreational and technical divers to utilize the same computer

Advanced technology
Including heart rate and skin temperature monitoring, CCR and Swim modes, Trimix algorithms and personalization options

Versatile features
Made for the waterman, not just the diver—with modes like Sport, Freediving, and Swim, plus calorie counting [when using LogTRAK]

Configurable displays
To make the computer your own for easier operation

MANTIS

KEY FEATURES

- Deco, Gauge, Freediving and CCR dive modes
- Fixed PPO2 CCR algorithm for closed circuit rebreather diving
- Predictive Multi-Gas algorithm for nitrox diving
- Chronograph with lap memory in Swim Mode
- Heart rate monitor with optional SCUBAPRO HRM belt
- Marine-grade 316L stainless steel casing and two-toned brushed finish
- Hoseless gas integration gives tank pressure and true remaining bottom time [M2 only]
- Digital tilt-compensated onboard compass allows for easy navigation under water or on the surface [M2 only]
- LogTRAK software available for PC/Mac and Android
- Maximum depth rate: 394ft/120m

SHOWN WITH OPTIONAL
COLOR BANDS

MANTIS 1 (M1)

A precision blend of sophisticated computer and beautiful timepiece, the M1 is designed for divers who crave the cutting-edge technology of the M2 but don't need air integration or an on-board digital compass. Incorporating SCUBAPRO's Human Factor Diving™, the M1 provides detailed personalized data through the use of biometrics. Offering just the right balance of topside features and underwater functions, you can count on the M1 for industrial-strength reliability that lasts.

MANTIS 1 BLACK new

Black Tech version. PVD (Physical Vapor Deposition) scratch-resistant coating and a stealth finish.

COMPLETE

*Shown with optional metal band, not included.

M2 (MANTIS 2) new

The M2 is a dive computer like no other. Developed using SCUBAPRO's Human Factor Diving™ approach to product design, the M2 offers everything you expect from the leader in diving equipment. Its stylish, brushed stainless steel casing is loaded with topside features and advanced underwater functions, including air integration and electronic navigation. But most importantly, the M2 incorporates cutting-edge biometrics that enable you to live your life in dive mode.

SCUBAPRO HEART RATE BELT

Monitors both heart rate and skin temp and allows computer to include diver's physiology in decompression calculations.

M2 new (MANTIS 2)

Successor of the breakout Mantis computer. Created for divers who demand air integration, the most comprehensive biometric monitoring, and sleek, stainless steel design. Featuring the same algorithm as the Galileo computer, the M2 makes for a perfect primary or secondary computer option. Experience the latest Human Factor Diving™ innovation that allows divers to feel more liberated than ever.

Real Time Air Integration
Blinking, colored light of the Smart Transmitter informs you of your tank pressure. No high-pressure hose necessary.

Easy to Read and Use
Exclusive, extra-sharp characters and intuitive four-button menu make M2 easy to read and use.

Versatility Above and Below
Take advantage of the SCUBA, Freediving, Gauge, and CCR modes, plus Swim and Sport modes for topside use.

Biometric Monitoring
Partner M2 with the exclusive SCUBAPRO Heart Rate Monitoring Belt to incorporate your heart rate and skin temperature into the computer's decompression calculation. The result is a personalized dive profile that increases your safety—and maximizes your diving experience.

Swiss Engineering and Style
Smart computing and comprehensive features, all packed into a stunning piece of Swiss engineering and design.

*Shown with optional all metal band

GALILEO

KEY FEATURES

- Extra-large dot matrix display
- Four-second sampling rate
- Hoseless gas integration
- Continuously updated average depth display
- Exclusive integrated heart rate monitor
- Full-tilt digital compass
- Personalization options
- Trimix Algorithm (optional download)
- Predictive Multi-Gas (optional on Luna)

COMPLETE

GALILEO SOL

The ultimate dive computer, Sol contains all core SCUBAPRO features in addition to all technology exclusive to the Galileo series. This state-of-the-art computer accounts for the effect of increased workload on human physiology with features like the integrated heart rate monitor which tailors decompression calculations to your dive.

GALILEO LUNA

The Galileo Luna is everything you need for an extraordinary underwater experience. Luna contains all core SCUBAPRO technology and all features of the Sol except two, which can be added as optional upgrades later [heart rate monitor and Predictive Multi-Gas].

LED & SMART+ TRANSMITTER new

Convenient and safe, a SCUBAPRO transmitter allows you to read tank pressure and true remaining bottom time (RBT) on the computer screen. It needs only to be paired once, the first time you use it. Coded transmission technology prevents interference between different dive computers. The latest LED version lets you know if your tank has gas without needing to activate the computer. Compatible with Galileo Sol, Galileo Luna and Mantis M2 personal dive computers.

SMART+

LED

CHROMIS

KEY FEATURES

- Extra-sharp characters inspired by Samurai katanas—and developed exclusively for Chromis—are proven to be exceptionally readable under water
- Patented stroke counter keeps track of strokes from the wrist or fin kicks from the ankle, while also calculating distance
- PC/MAC interface with USB interface cradle accessory
- Continuously updated average depth display in gauge mode which can be reset by the diver at any time
- Independent stopwatch under water in scuba and gauge modes
- Maximum depth rate: 394ft/120m

CHROMIS new new colors

A loaded wrist computer, Chromis is ready for your next adventure, in or out of the water. Divers will enjoy the large, easy-to-read display and a host of features, including a full-featured dive computer, freediving and gauge modes, timepiece, and patented stroke counter. Chromis has all the core SCUBAPRO features minus PMG.

Enjoy the Chromis in a color that celebrates your diving style. Choices include Black, White, Orange, Lime Green, Black/Gold, Full Black and Deep Blue.

ALADIN

Aladin dive computers provide discerning divers of all skill levels with a range of computing choices, in a variety of configurations, to suit virtually any dive scenario. Whether you're an experienced technical diver or a beginning recreational diver, prefer your computer in a wrist-mount or a console, need multi-gas capability or just like to keep it simple, there's an Aladin dive computer for you.

ALADIN TEC 3G new

While targeted primarily to technical divers who need multi-gas and CCR support functions, the 3G is also the perfect dive computer for recreational divers striving to evolve in their sport.

ALADIN ONE new

Comfortable, intuitive all-round computer available as a wrist unit or in a console with pressure gauge and compass.

ALADIN SPORT new

Compact and intuitive, the Aladin Sport is an excellent starter computer for new divers and a reliable back-up for any diver. Featuring three dive modes and nitrox capability to 50 percent.

DIGITAL 330M

Electronic data delivery system provides actual and maximum depth, ascent speed, dive time and temperature. Rated to 1082ft/330m.

3-GAUGE IN-LINE CONSOLES new

Pressure and depth gauges with choice of 35-degree-tilt FS-2 or 26-degree-tilt FS-1.5 compass.

2-GAUGE CONSOLES new

U-Line or In-Line. Compact plastic or metal-case pressure gauge and choice of compact or standard depth gauge.

PRESSURE GAUGES new

Compact metal or plastic-case, reading psi, bar or both.

DEPTH GAUGE, WRIST MOUNT

Oil-filled Bourdon tube design in an impact-resistant nylon case.

COMPASSES new

FS-1.5 calibrated to the Northern hemisphere, or the FS-2 available for both hemispheres.

FS-1.5

FS-2

CORE FEATURES

For all SCUBAPRO DIVE Computers

Micro-bubble: Choosing a micro-bubble level between LO-L5 allows you to increase your safety by adapting to a particular environment. This feature allows divers to either take up less nitrogen or off-gas more quickly.

Predictive Multi-Gas (PMG): Lets you enjoy the full benefits of carrying high oxygen concentration mixes in addition to your main breathing gas. The computer calculates the decompression schedule for all possible gas combinations and adapts the calculation accordingly. [Not available on Chromis or Aladin Sport]

Continuous average depth reading: Available in gauge mode and can be reset by the user anytime.

Profile Dependent Intermediate Stops (PDIS): Calculates an intermediate stop based on how much nitrogen uptake your body has endured, taking into account your current dive, previous dives, and breathing mixes. [Not available on Aladin Sport]

Enriched air (Nitrox): 21%-100%. The ppO2 is adjustable between 1 and 1,6 bar.

Gauge mode: Turns off all warnings and alarms (except low battery alerts) and monitors depth, time, and temperature without decompression calculations.

Logbook: Records depth, temperature, and heart rate profiles after the dive and stores the most recent 100 hours of dive information at a 4-second sampling rate, which can be downloaded to a PC or a Mac.

Freediving mode: A collection of features developed for freedivers, including a faster sampling rate, manual start, specialized alarms and warnings, adjustable water density, and specific logbook. Available as a free upgrade for Galileo Sol and Galileo Luna on SCUBAPRO.com. [Not available on the Aladin TEC 3H]

Altimeter: Measures altitude and alerts the diver when approaching an altitude incompatible with saturation status after a recent dive.

Bookmark: Allows you to highlight specific moments with a simple button press.

Active back light: With push-on and push-off function.

Replaceable battery: By user or dealer.

WHY MEASURE YOUR HEART RATE?

Heart rate monitoring continuously calculates decompression schedules more accurately based on workload, so you can adjust your dive accordingly for maximized safety. **Scan to access our HRM booklet. Also available at SCUBAPRO.com.**

An underwater photograph showing a diver's hand in a black and white textured BC glove reaching towards a large, textured rock. The scene is surrounded by vibrant yellow and orange coral against a clear blue background. A white text box is overlaid on the left side of the image.

FORM MEETS FUNCTION.

Your BC should be in perfect harmony with you. That's why SCUBAPRO offers the ideal combination of comfortable fit, flexibility and intuitive design. Everything right where you need it. No wasted effort. Adjustments easily made on the fly. See how much more you can explore with the freedom of knowing that you and your gear are working as one.

CONTROL THAT'S SECOND TO NONE.

Any jacket lets you adjust buoyancy. Only SCUBAPRO BCs, created with Human Factor Diving™ innovation, put you in charge of the dive. Discover the power of having the most personalization features, superior comfort, and premium construction on your side.

COMFORT AT EVERY ANGLE.

SCUBAPRO takes a unique approach to designing BCs; thinking beyond the water to give you the best experience before, during, and after the dive. Accomplishing that goal starts with offering the industry's widest selection of sizes and styles, each tailored for differing body types and diving. Female divers in particular never have to sacrifice style or specialized fit with a SCUBAPRO BC.

FRONT-ADJUSTABLE

STABILIZING

Once on, easy-adjustment features provide snug comfort that stays put. In the water, ultra-soft design and flexibility allow you to move naturally—so you can spend downtime exploring, not adjusting.

After the dive, SCUBAPRO BCs dry quickly and pack smart for easy traveling to the next adventure.

MADE TO BECOME YOURS.

SCUBAPRO BCs include all your favorite options, with many ways to make it your own. Choose from a spectrum of color choices. Customize your BC with accessory kits and mountable knives. Take advantage of a multitude of configuration options on every jacket. Add an Air 2 fifth generation to streamline your diving with a secondary air source that breathes like your regulator. However you use it, your SCUBAPRO BC is made to meet your needs.

BUILT FOR A LIFETIME OF DIVES.

SCUBAPRO BCs are durable beyond the rigors of typical diving, down to the last detail. Every buckle, zipper, strap, and grommet is tested for real-world durability and long-term use. High-quality fabrics are incorporated throughout the BCs for additional rip resistance and lasting shape. When divers are ready to upgrade to the highest-quality BC available, they choose SCUBAPRO—the first choice of instructors around the world.

HUMAN FACTOR DIVING™

The most style options
Including fits for women

Designed for more control
So you can find balance regardless
of orientation

Features offered nowhere else
Such as three dump valves on many
of our BCs

FRONT ADJUSTABLE

GO travel friendly improved

Go dive the world with this true travel BC. Lightweight, easy-to-pack and extremely comfortable, it includes an integrated weight system, new optional trim pouches and a bevy of other original features, as well as SCUBAPRO quality, style, and spirit of adventure. The large size weighs only 4.3lbs/1.9kg.

FRONT ADJUSTABLE

X-BLACK

The x-black features the exclusive AirFlex system, highlighted by the red bungees, that simplifies buoyancy control and guarantees high stability. With rigid backed weight pockets, redesigned dump valves, and updated BPI and elbow. One of our most feature-rich BCs, the X-Black is also one of the most comfortable, even when fully inflated, thanks to its ergonomic cut.

EQUATOR

The Equator is extremely comfortable and fully adjustable. It comes with an integrated weight system and a wide range of great features. Its compact and lightweight design make it an ideal front-adjustable BC for diving at home or elsewhere.

FRONT ADJUSTABLE

T-ONE

The new design of the T-One makes our most popular rental BC and ideal first purchase when you start diving. We have added features, improving comfort and ease of use, with still the same reliability and outstanding resistance the T-One is well known for. Size colour code on both neck and pockets.

X-FORCE

X-Force features our pre-formed, wrap-around bladder providing higher buoyancy without squeezing when fully inflated. This design offers superior fit and weight distribution. X-Force is more than a powerhouse of features, making it the preferred choice of passionate and advanced recreational divers. With rigid-backed weight pockets, redesigned dump valves, and updated BPI and elbow.

GLIDEPRO

The "PRO" of our front-adjustable line, every aspect of this jacket has been specifically designed with your comfort in mind. Fully adjustable, it comes with an integrated weight system and a wide range of outstanding features including a SCUBAPRO exclusive wraparound air bladder. The Glide Pro design ensures a streamlined fit and exceptional buoyancy control.

STABILIZING

CLASSIC

The Classic combines the best features, past and present. This version incorporates RF welding technology with our unbeatable rugged performance the Classic is known for. Discerning divers will appreciate details like the easy-access chest pockets.

COMPARISON CHART

BCs

Back Flotation: Optimizes swimming position for freedom of movement and reduced drag.

Front Adjustable: Ease of use with good stability above and below the surface.

Stabilizing: Provides easy and precise movement with exceptional lift.

COMPLETE SYSTEMS

X-TEK SIDEMOUNT SYSTEM

This easy-to-wear addition is compatible with the current X-TEK line and features a soft Airnet backpack, bungees and hooks for tank support and streamlining, making sidemount diving more convenient and comfortable. Includes stainless steel grommets, D-rings, handles, and valves.

KEY FEATURES

- 1000D Cordura outer shell
- Soltane inner bladder
- Ergonomic SCUBAPRO balanced inflator
- Specifically designed for sidemount harness
- Attached crotch strap

HARNESSES

X-TEK FORM-TEK HARNESS

A 3-piece harness system with anatomically optimized back padding and shoulder straps that can be adjusted in length and alignment for maximum comfort. Comes with twelve stainless steel D-rings. The harness can be equipped with an optional quick-release weight system.

*Shown fully assembled with crotch strap and backplate, not included.

X-TEK PURE-TEK HARNESS

Made of secure, continuous webbing which weaves through a back plate to provide a custom fit. Included: waist buckle, two shoulder D-rings, one left D-ring on the waist belt, and "tri-glide" fasteners.

*Shown fully assembled with crotch strap and backplate, not included.

WINGS

X-TEK DONUT WINGS

Unprecedented buoyancy control regardless of diving position. For single (30lbs/13kg or 40lbs/18kg lift) and double (40lbs/18kg or 60lbs/27kg lift) tank diving.

*Shown fully assembled with harness and backplate.

KEY FEATURES

- 1680D Ballistic Nylon outer shell
- 420D Nylon inner bladder
- Proven SCUBAPRO balanced inflator

X-TEK HORSESHOE (HS) WING

A horseshoe wing with a lift capacity of 90lbs/40kg. for double tanks. With bungee.

KEY FEATURES

- 1680D Ballistic Nylon outer shell
- 420D Nylon inner bladder
- Bungee system for minimum drag
- Proven SCUBAPRO balanced inflator

BACK PLATES

X-TEK STAINLESS STEEL BACK PLATE

Delivers optimal stability. Numerous attachment points allow for optional storage pack or other accessories. Weight: 5.3lbs/2.4kg.

X-TEK ALUMINUM BACK PLATE

new color

Perfect travel companion features a stealth black coating. Ultra-light yet extremely stable. Weight: 2lbs/0.9kg.

X-TEK ACCESSORIES

X-TEK SINGLE TANK ADAPTER

Attaches to back plate for single tank dives.
Includes two Super Cinch straps.

X-TEK BACK PLATE STORAGE PACK

Storage pack attaches to back plate for additional space to carry accessories.

X-TEK ACCESSORY POUCHES

Waistband pouches with internal D-rings to stow accessories. Two sizes.

X-TEK COUNTERWEIGHT POCKET

Mounts to tank or waistband for optimal weight distribution.
Holds 2.2lbs/1kg.

WET NOTES

Pocket-sized notebook with plastic pages and a dedicated pencil.

CROTCH STRAP

Two inches wide with two stainless steel D-rings.

QUICK-RELEASE WEIGHT POCKETS

For use with an X-TEK Pure Tek harness or a Litehawk BC.

SIDEMOUNT WING COVER

Fits both sidemount air cell sizes and keeps your rig streamlined while increasing durability.

SHOULDER PADS

Additional shoulder protection for straps.

REGULATOR NECKLACE

Flexible, long-lasting band for back-up second stage to ensure a secure and quick recovery.

BOLT KITS

Extra bolts for setting up the optimal X-TEK configuration for your personal use.

STAGE RIGGING KIT

Available in 40 and 80 cuft.

MARKER BUOY

Five feet long with double inflation system and bottom weights for upright stability.

BOLT SNAPS

For securing accessories and stage tanks. Made of AISI 316 stainless steel.

WHEREVER YOU ARE, YOU'RE COVERED.

The commitment to keeping divers more comfortable, longer is in the fabric of every SCUBAPRO suit. It's a difference you can't miss—from the moment you gear up, through the entire dive. No other name offers more premium options that combine unwavering performance with the comfort and style to suit you to a T.

NO COMPROMISING WARMTH, FIT, OR STYLE.

SCUBAPRO suits set the standard for comfort, style, and thermal protection. Unlike other manufacturers, SCUBAPRO engineers suits with the same attention to detail given to other technical gear, with a continued commitment to innovation. That's why SCUBAPRO suits undergo a constant evolution in materials and construction. Each feature on every SCUBAPRO suit is expertly designed and engineered to keep you protected throughout your entire dive, be it in warm equatorial currents or the frigid seas of the Arctic. Whatever the ocean environment demands, SCUBAPRO suits stylishly deliver.

Even more flexibility
and comfort

SCUBAPRO
cares

X-Foam: X-Foam is made from limestone neoprene, meaning it's completely petroleum-free and complies with the very strict Polycyclic Aromatic Hydrocarbons (PAH) test requirements. SCUBAPRO was the first to offer this special neoprene blend to better protect divers and our oceans.

Solvent Free Glue: SCUBAPRO is the first in the industry to offer this environmentally and diver friendly adhesive material.

Neck, wrist, diagonal back and ankle YKK zippers make it easy to get on and off

Strategic, limited panel layouts, that flatter the body and add comfort

SUPERIOR FIT ALL AROUND.

Through an exclusive process called **Body Mapping**, SCUBAPRO designs a more complete suit around your needs. Careful attention is given to material selection by panel, such as utilizing Diamond Span and waterproof neoprene coatings that dry quicker.

Body Mapping also influences the overall location of panels, seaming, and zippers. The result is a suit with maximum stretch, better comfort and durability, and the best performance possible.

SCUBAPRO also uses unique, thinner materials engineered to perform better than suits using thicker, more traditional materials. All of this ensures a better fit, meaning more warmth, and longer suit life.

SPECIALIZED PERFORMANCE FEATURES.

It's the unique details that make a SCUBAPRO suit truly exceptional in comfort and thermal protection.

DIAMOND SPAN LINER: Designed to drain water and dry quickly for added comfort when preparing for repeated dives.

EVERFLEX MATERIAL: A neoprene material produced using X-foam that is lightweight, flexible, and durable.

PROTECTIVE SEALS: Strategically placed to minimize water entry and keep you warmer.

ANTI-ABRASION MATERIAL: Included in all high-stress areas of the suits to ensure lasting quality.

SIZES TAILORED FOR WOMEN: For lasting comfort that feels custom-fit for you.

OTHER WARMTH ESSENTIALS: Spine pads, double collars, and zippers with larger flaps, and gussets to block water entry enable our suits to test higher in warmth than other suits on the market.

THE WIDEST SELECTION IN THE INDUSTRY.

Wearing SCUBAPRO is the next best thing to having a custom-made suit. The range of size offerings cannot be matched. What's more, all SCUBAPRO suits lead their categories in comfort, thermal protection, and overall quality. So whichever one you choose, you're always diving with the best.

EVERFLEX

EVERFLEX STEAMERS improved new sizes

These ultra warm and comfortable steamers are built with 100 percent Everflex neoprene and incorporate SCUBAPRO's exclusive Pure Design Concept using fewer panels and seams, allowing maximum stretch for extreme freedom. All 2016 Everflex steamers come with a Diamond Span water-draining inside lining that now features a second lining for improved stretch and cold-water protection. Suits are also assembled using a new and innovative solvent-free water-based glue, a major step towards a truly green wetsuit.

3/2mm thicknesses.

Available in sizes: Men XS-2XL, Women 2XS-L.

OUR UNIQUE BLUE DIAMOND SPAN INNER

LINING WITH WATER DRAINING MATERIAL ISN'T JUST EXCEPTIONALLY COMFORTABLE AND QUICK DRYING. IT ENHANCES COLD WATER PROTECTION, KEEPING YOU WARMER, LONGER.

For over 50 years, SCUBAPRO has been committed to protecting the oceans. From manufacturing processes and materials to reusable packaging to sponsoring conservation efforts of our Deep Elite ambassadors, we at SCUBAPRO believe we have a strong responsibility to the very environments we love to explore.

We encourage new and seasoned divers to not just dive in, but to experience, discover and protect the oceans. And we lead by example.

SCUBAPRO was first in diving in 2012 to introduce X-FOAM blend neoprene as part of our ongoing effort to better protect divers and our environment. This year, SCUBAPRO is the first to introduce solvent-free glue. We've tested it for over 400 hours – and we know it is better for you – and better for the environment.

DEFINITION

DEFINITION STEAMERS new

User-friendly wetsuits use a 3D cut and special tailoring to fit the body like a glove, provide extra stretch where needed, and enhance warmth and comfort. Colors vary on female suits based on thickness.

3mm thicknesses.

Available in sizes: Men XS-2XL, Women 2XS-L.

3MM

Pink

Yellow

X-FOAM - ALL SCUBAPRO NEOPRENE IS X-FOAM

- PETROLEUM FREE made from limestone neoprene
- ONLY FORMULA THAT COMPLIES WITH P.A.H. TESTS ensuring fewer pollutants
- LIGHTER WEIGHT for travel and comfort
- GREATER ELASTICITY increases comfort and mobility
- HIGHER INSULATION EFFICIENCY for better heat retention
- VERY DURABLE for years of diving adventures

THERMAL TEC

THERMAL TEC new

A serious suit for serious divers. The perfect combination of advanced materials and thoughtful construction for outstanding durability, comfort, and protection. Fast-drying N2S neoprene on main panels of suit, plus non-porous Fairskin material on external torso panel facilitates quick drying and helps prevent evaporative heat loss. Heliospan material on internal torso for added warmth with EverFlex stretch panels on stressed locations provide extra flexibility. Raw-cut collar for unprecedented comfort and zippers on wrist and ankles facilitate easy donning and ensure a virtually watertight seal. The Thermal Tec features strong double blind-stitching on all seams for comfort and durability and with added nylon webbing thumb loop at base of back zipper to aid donning, metal main zipper slider for durability and ease of operation.

3mm and 5mm thicknesses.

Available in sizes: Men XS-2XL, Women 2XS-L.

PROFILE

PROFILE

This neoprene suit will be a steady companion for all your diving and snorkeling activities. The expanded line is newly designed and elegantly cut and styled. Each suit is built in durable, fast-drying nylon and two-sided X-Foam neoprene. Profile wetsuits provide maximum comfort at all levels.

Available in sizes: Men XS-3XL, Women 2XS-L.

Available in sizes: XS-2XL.

TROPIC GLOVE, 1.5MM

Backed with neoprene.

Available in sizes: 2XS-2XL.

A NATURAL EXTENSION OF YOU.

Your fins, mask, and snorkel should feel custom-engineered for you. That's why SCUBAPRO has crafted a wide selection of each, reinforced with top-quality materials for ultimate performance. It's the perfect fit for those who want to go further, see more, and lose themselves in the experience.

SEAWING NOVA new colors new sizes

The multiple-award-winning Seawing Nova delivers the power, acceleration and maneuverability of a blade fin, with the kicking comfort, speed and efficiency of a split fin. You'll be hard-pressed to find a fin more comfortable to wear or fun to kick.

Available in sizes: XS-XL.

OPEN
HEEL

SEAWING NOVA GORILLA

A slightly stiffer blade results in increased power and control for divers who prefer more feedback in their kicks. It also allows for more effective sculling and reverse kicking, making the Gorilla an excellent choice for tech divers and dive instructors.

Available in sizes: XS-XL.

JET FIN new colors

SCUBAPRO Jet Fins have a long and celebrated history of performance. They set the standard for power and durability in 1965 and continue to be immensely popular today. Optional spring straps fit Twin Jet and Jet Fin.

Available in sizes: M-2XL.

WITH SPRING STRAP

WITH SPRING STRAP

JET SPORT

The Jet Sport generates propulsive kicking power with excellent stability. It's easy to maneuver too, delivering the perfect blend of performance, comfort and price.

Available in sizes: XS-XL.

FULL FOOT

OPEN HEEL

SPECTRA

A metallic-look frame, dual lens mask. Exclusive paint process gives your mask the look of stylish eyewear.

Colors: CLEAR: w/silver-blue, red, yellow // BLACK: w/silver or mirror.

SPECTRA 2

The Spectra 2 resembles the metallic-look frame, twin lens Spectra mask, but is smaller in size.

Colors: CLEAR: w/white, peach // BLACK: w/silver black or purple.

SPECTRA TRUFIT

A unique approach to mask fitting, the ultra-thin 1st generation Trufit silicone skirt is super-soft and oh-so-comfortable.

Colors: BLACK: w/silver or mirror // CLEAR: w/blue and red.

TRUFIT TECHNOLOGY — FEELS LIKE NOTHING. FITS LIKE NOTHING ELSE.

SCUBAPRO's revolutionary Trufit mask skirt technology, benefiting from three generations of design and development, forms a watertight seal on virtually any face, allowing divers to have a secure mask without sacrificing comfort. Trufit Technology mask skirts are designed with the highest quality silicone and are identifiable by their unique ribbing texture.

SOLO

Enjoy the view in a streamlined, low-volume frameless mask. Double-sealed silicone skirt molds to the face for a comfortable, watertight seal.

Colors: BLACK: w/white.

FLUX TWIN

An attractive low-volume two-lens mask. High-impact polycarbonate frame for durability and strength.

Colors: CLEAR: w/white, blue // BLACK: w/metallic red or black.

* Optical lens available.

CRYSTAL VU

A single lens mask with seamless side windows for a panoramic field of vision.

Colors: CLEAR: w/blue, yellow, red or white // BLACK: w/silver, orange.

FINO

A classic low-volume mask in a two-lens design. Prescription lens available.

Colors: CLEAR: w/black, blue or clear // BLACK: w/black.

VIBE

Classic design with trendy colors. The design offers 30% larger field of vision, including upwards.

Colors: CLEAR: w/transparent purple or blue, ice blue, orange, white

ZOOM

Low volume twin lens mask with liquid silicone skirt. Perfect for snorkeling.

Colors: CLEAR: w/transparent black, blue, yellow or purple, orange // BLACK: w/black

TRINIDAD MASK & SNORKEL COMBO

A Frameless and low-volume mask design. With vented flex snorkel with splash guard.

Colors: BLACK

FULL-FACE MASK

Professional-quality mask is designed for diving in cold water, wrecks or caves and technical diving. It is widely used by military and commercial divers worldwide.

Colors: BLACK

ANGEL

Low-volume frameless mask fits comfortably and offers a superb field of view. With easy-adjust buckles.

Colors: WHITE

FRAMELESS

Diving's original frameless mask features a distinctive rectangular shape for excellent field of view. The skirt's soft double-edge seal keeps water out and feels good against the skin. Gorilla features a larger skirt.

Colors: BLACK

NEOPRENE MASK STRAPS

new

No more tangled hair and twisted headbands.

* Slip-over sleeve.

GO PRO MASK MOUNT

new

Lightweight GoPro mask mount fits virtually every double lens mask on the market and is easy to install and remove.

SPECTRA SEMI-DRY

A large-bore snorkel with a semi-dry top design to keep water from entering the tube. This snorkel not only has an unique paint application but is top in comfort, both in ease of breathing and clearing.

NEXUS

Low-drag design features a splashguard and angled purge to divert bubbles out of your line of sight. Can be folded for stowage.

ESCAPE SEMI-DRY

A large-bore snorkel with a semi-dry top design to keep water from entering the tube. Includes an efficient purge valve, a regulator-style mouthpiece for added comfort, and a quick-release removable clip.

FUSION PRO new

Modern design features a splashguard top and a lower flex hose. The comfortable silicone mouthpiece is interchangeable.

PHOENIX 2

Corrugated hose lets the mouthpiece hang clear when not in use. Dry top blocks water while allowing lots of airflow.

EXPRESS

Recreational snorkel with silicone mouth piece and water drain valve.

BUILT FOR THE ADVENTURE.

SCUBAPRO is your trusted travel partner, in and out of the water. Complete your experience with bags that go the distance, knives that give you an edge, and LED lights that truly shine. Every piece is built to withstand baggage claim, the beach, and any other adventure you can pack in.

BAGS

DIVE 'N ROLL

Designed to securely transport all your primary diving gear, this large wheeler has a virtually indestructible hard-shell case, corrosion-resistant zippers, and a removable backpack.

Dimensions // 72x46x44cm.
Weight // 5.8kg. Volume // 146L.

PORTER BAG improved

A foldable wheeler with extra-large volume for all your gear. Includes integrated wheels, backpack system, corrosion-resistant U-shaped zipper, two front and two inside pockets, and reinforced bottom. The bag folds in on itself for easy storage.

Dimensions // 85x55x35cm.
Weight // 2.5kg. Volume // 164L.
Folded dimensions // 51x41x18cm.

CARAVAN BAG improved

Easy to move from the car to the boat or roll through an airport, the Caravan is the ideal large-gear storage and travel bag. Features include a corrosion-resistant zipper, reinforced saltwater-resistant wheels, exterior side pockets and telescopic handle.

Dimensions // 70x40x35cm.
Weight // 3.9kg. Volume // 98L.

XP PACK DUO new

Huge main compartment includes two mesh pockets for smaller items, plus a zippered front-cover sleeve provides quick-access stowage. Telescopic tow handle and durable wheels allow for near-effortless rolling.

Dimensions // 80x49x43cm.
Weight // 4.55kg. Volume // 169L.

CABIN BAG improved

This semi-rigid roller bag conforms to IATA airline regulations, making it the perfect carry-on. Includes a telescopic tow handle and reinforced wheels.

Dimensions // 55x34x22cm.
Weight // 2.25kg. Volume // 41L.

MINI DRYBAG new

Heavy-duty PVC (Tarpaulin).

Dimensions // 40x25x9.5cm.
Weight // 0.8kg. Volume // 10L.

DRY BAGS

These versatile dry duffels are made of heavy-duty PVC (Tarpaulin) fabric, with large main compartments offering substantial storage capacity. Included: carry straps that convert into a backpack system.

120L

Dimensions // 85x40x35cm.
Weight // 2.6kg.
Volume // 119L.

50L

Dimensions // 70x30x25cm.
Weight // 1.7kg.
Volume // 53L.

MESH BAG COATED new

Made of PVC coated mesh, this sturdy bag is roomy enough for a full set of gear, yet is lightweight and folds easily for storage.

Dimensions // 69x35cm (diameter).
Weight // 0.65kg. Volume // 86L

MESH BAG POCKETABLE new

Foldable duffel style mesh bag that packs into its own pocket, made of durable soft mesh material, this is a great travel companion for use as a boat bag or keeping all your gear together in the resort gear room after washing. Packs up small for travel.

Dimensions // 71x37x35cm.
Weight // 0.4kg. Volume // 92L.

MESH SACK

Durable nylon mesh backpack is perfect for carrying snorkeling gear or tropical dive gear. Includes a padded shoulder strap.

Dimensions // 66x39cm (diameter).
Weight // 500g. Volume // 80L.

MESH BAG

A popular, classic dive bag made of durable nylon mesh that lets water drain easily. Roomy and strong enough for a full set of gear, yet lightweight and foldable for easy storage. Perfect for live aboards or for carrying suits separately.

Dimensions // 70x40x30cm.
Weight // 450g. Volume // 84L.

Dimensions // 68x38x33cm. new
Weight // 750g. Volume // 85L.

REGULATOR BAG + COMPUTER BAG new

Rip-stop nylon.

Regulator Bag dimensions // 35x26x10cm.
Weight // 350g. Volume // 9L.
Computer Bag dimensions // 11.5x7x15cm.
Weight // 100g. Volume // 1L.

TRAVEL REG BAG, VINTAGE new

Heavy-duty, water resistant PVC [Tarpaulin].

Dimensions // 32x32x10cm.
Weight // 800g. Volume // 10L.

TRAVEL KIT

Heavy-duty PVC [Tarpaulin].

Dimensions // 25x14x10cm.
Weight // 200g. Volume // 4L.

DRY BAG TPU W/SHOULDER STRAP

A cylinder-style, large volume bag keeps contents sealed and dry. With a roll-top closure and stitched/tapped construction water tightness is assured. The padded backpack straps or handle give carrying convenience.

NOVA LIGHTS

LED lights are the dive lights of choice among today's divers, and none compare to SCUBAPRO's Novalights. Light years ahead in dive light design, Novalights are equipped with high-intensity LEDs that far outpace the competition in brilliant lumen illumination, they are machined from heavy-duty aluminum, making them both lightweight and built to last, and they offer multiple power modes and safety features that rank best in class. Nothing lights up a dive like a Novalight.

NOVALIGHT 720/720R new

Newest Cree XPL LED. 100% or 50% power modes. Choose from full-sized 720 (8.7in/22.2cm long, 3 C cells), or compact 720R (5.5in/14cm long, rechargeable Li-ion). Batteries sold separately.

NOVALIGHT 220 new

Just 3.5in/9cm long, it can be stored in the smallest BC pocket. Three power modes: 100%, 50% and Flash. Batteries sold separately.

* Shown with actual mask attachment, not included.

NOVA 200

Easy-grip aluminum casing and high-intensity LED. Powered by 3 AAA batteries [sold separately].

KNIVES

K6 new

Stainless steel blade offers smooth and serrated edges plus line-cutting notch. Includes injected molded sheath.

MAKO

Compact dive knife offered in stainless steel or titanium.

WHITE TIP

Excellent cutting edge. Stainless steel blade resists surface oxidation. Includes locking sheath and BC kit.

MESH CUTTER new

Used with a pulling motion, improving leverage, cutting power and safety. Includes shackle key and sheath.

**SCUBAPRO OFFERS
A FULL LINE OF ACCESSORIES.**

VISIT WWW.SCUBAPRO.COM FOR A COMPLETE LIST.

An underwater photograph of a kelp forest. The water is a clear, vibrant blue. The kelp has long, thin, brownish-green blades that are illuminated from above, creating a golden glow. The blades are swaying and overlapping, creating a dense, textured appearance. A white rectangular box with a diagonal cutout is positioned on the left side of the image, containing text.

FIND YOUR FREEDOM.

Leave your tank behind and slip into the ocean with the freedom to explore. With innovation and performance at the forefront, SCUBAPRO's debut freediving line was created with world-class freedivers. Every fin, mask, snorkel, and wetsuit was designed to make the most of your single breath.

FREEDIVING

SCUBAPRO's impressive line-up of freediving gear is like no other. Created in collaboration with some of the world's best freedivers, SCUBAPRO lives up to its premium reputation by delivering sleek hydrodynamic designs, high tech materials and expert craftsmanship. No matter what kind of freediving interests you, our gear line is engineered to take you there... faster, deeper and longer.

APNEA 2

Smooth gliding underwater, easy breathing.
Easy donning and doffing

Available in sizes:
Men S-2XL. Women 2XS-L.

APNEA OVERALL

Smooth gliding underwater, easy breathing.
Easy donning and doffing

Available in sizes:
Men S-2XL. Women 2XS-L.

FINS

Developed by SCUBAPRO in partnership with the world-record-setting fin manufacturer, Trygons, these new state-of-the-art carbon fins deliver the ultimate in comfort and kicking performance at any skill level. Our smallest size fits women size 5 and our largest size fits men 12.

S1 new

Highest quality, 99-percent pure carbon blade, produces the most powerful and efficient fin on the market. Exceptional power recovery and unparalleled performance, the unique design reduces turbulence and drag forces.

Available in sizes:
XS-2XL.

S2 new

Built with a carbon layer over a fiberglass core, the S2 delivers kicking performance comparable to the S1, but at a value price. 50 percent carbon fiber.

Available in sizes:
XS-2XL.

S3 new

Long, soft blade made of a high performance plastic compound. Generates power and speed while maintaining excellent energy efficiency. Durable and affordable. Great option for scuba divers too.

Available in sizes:
XS-2XL.

MONOFIN new

Constructed of same materials S2, the soft foot pockets, blade action and double-wide shape generate exceptionally powerful kicking performance and comfort. 50 percent carbon fiber.

MONOFIN BAG new

Transport your Monofin with ease. Made from 100% water-resistant Tarpaulin with backpack straps for hands-free carrying.

STEEL COMP new

Ultra-low internal volume makes equalizing easy. Mask compresses on descent so equalization is not required as often. Preferred by deep divers. Not recommended for scuba diving.

Colors: WHITE // BLACK.

STEEL

Ideal for freedivers thanks to extremely small internal volume. The black silicone prevents light reflections.

Color: BLACK

APNEA SNORKEL new

Ultra-flexible, removable upper barrel. Folds easily for stowage.

FREEDIVING BELT new

STANDARD

MARSEILLE

Length // 59in/1500mm. Width // 1.8in/45mm.
