

NEW BUT UNTESTED

The latest kit to hit the dive shops

Scubapro Apnea Snorkel

This snorkel looks as simple as any other breathing tube but the concept is rather more sophisticated and user-friendly. The flexible barrel allows it to be stored in a BC pocket during your dive but to be instantly available for surface breathing. A swivel is designed to let you angle the mouthpiece for comfort, and the top section can be removed if you like your snorkel on the short side. It costs £9.
