

SCUBAPRO

Raja Ampat, Indonesia

SMALL IN SIZE -
BIG IN PERFORMANCE

C370

Breathe smoothly and silently, at all depths, and all tank pressures, with the air-balanced C370. This is the mid-range regulator of choice for recreational divers looking for ease of use and rock-solid reliability. And thanks to its compact size and light weight, it's also ideal for dive travelers, female divers and smaller-sized divers. Upgrade your dive kit with a C370 and get ready to giant-stride into blue-water adventure with total confidence - anywhere, anytime.

C370

**SMALL IN SIZE.
BIG IN PERFORMANCE.**

Raja Ampat, Indonesia

■ AIR-BALANCED

Valve smoothes out the inhalation effort for consistent, comfortable airflow at varying depths and supply pressures with rock-solid reliability.

■ TRAVEL FRIENDLY

Lightweight and easy to handle, the compact casing and new exhaust tee take up little space in a dive bag.

■ BUILT TO LAST

Rugged fiberglass reinforced nylon casing with stainless steel frame on the front cover will stand up to years of use.

■ LARGE PURGE BUTTON

Is well-positioned and easy to activate, even wearing thick gloves.

■ NEW EXHAUST TEE

Reduces exhalation effort which in turn reduces overall work of breathing.

■ FULL USER CONTROLS

Diver-adjustable inhalation effort knob and coaxial Venturi-Initiated Vacuum Assist [VIVA] let you regulate inhalation effort and prevent free flows at depth and on the surface.

■ SUPER FLOW HOSE

Features an oversized bore that allows more air to flow on each inhalation.

■ HI-FLOW MOUTHPIECE

Improves airflow as well as mouth comfort, fitting all mouth sizes, from smallest to largest.

MK11/C370

A great regulator system for dive-trekkers. The air-balanced diaphragm MK11 first stage, with its chrome-plated brass body specially designed to reduce size and weight, is just the right size and features internal parts that are sealed from the elements. Team it with the air-balanced C370 and you have a compact, reliable, user-friendly air delivery system and the ideal travel companion.
